

Subject: Completed Website for *Wheels on Fire*

Dear John O'Reilly,

We are pleased to inform you that we have successfully completed the website for your business, *Wheels on Fire*. The design reflects your requests and includes all the features you specified.

Here's an overview of the main elements we incorporated:

- **Homepage (Index Page):**
The homepage features a welcoming message — “Welcome to the Wheels on Fire website!” — in bright red to make it stand out and reflect the business name. The background image showcases a flaming car tire, with a slightly transparent dark overlay to ensure readability. We used white text for contrast and a clean, modern look.
- **Car Listings & Car of the Week Section:**
We added images of cars for sale to give visitors a preview of your offerings. The "Car of the Week" is revealed through a dropdown interaction, displaying the image and accompanying details when clicked.
- **About Page:**
This section outlines your company's mission, objectives, and high standards. It includes a team photo with dropdown bios for each member, helping users understand who they might be interacting with. We also added a section on the company's history and achievements, accessible via dropdown.
- **Contact Page:**
The contact page includes all essential details — phone number, email, business location (linked to Google Maps), and your opening hours. We've also included a contact form where users can submit their name, phone number, and email. We've stated that all inquiries will receive a response within 24 hours to assure visitors of your responsiveness.
- **Navigation & Design:**
The navigation bar has a sleek and modern appearance, making it easy to use and appealing to potential customers.

We hope the website meets your expectations and captures the spirit of *Wheels on Fire*. Please let us know your thoughts, and if there are any changes or additions you'd like us to make.

**Kind regards,
HHD**
